HIGH-CAPACITY HARD DRIVES FROM THE CAPACITY LEADER

Introducing the perfect solution to the "No disk space available" problem: an award-winning, high-capacity 3.5-inch internal hard drive from Hitachi. Hitachi pioneered the world's highest-capacity hard drives and now you can take advantage of this achievement and boost the capacity of your own system.

Whether you need to replace an existing drive or add a second drive to your system, Hitachi has the right capacity and performance combination to satisfy your need for speed and appetite for space. From critical business files to music, movies, photos and games, you can trust Hitachi hard drives for storage and safe keeping. Generations of industry-proven designs make Deskstar 3.5-inch internal drives the best choice for your storage upgrade needs.

HOW MUCH IS ENOUGH?

The type of information you store helps determine your storage requirements. Text files use very little space but music, photos and video can quickly fill a smaller-capacity hard drive. Just how much space do you need? Use the table below to select a capacity to meet your needs but still give you room to grow!
