

# REACH Certificate of Compliance

HGST Products

As of May 16, 2017

a Western Digital brand

HGST products are in compliance with European Union Regulation 1907/2006 on the Registration Evaluation Authorization and Restriction of Chemicals (REACH).

Based on information provided by our suppliers, HGST designates the products listed in this certificate as REACH compliant for orders based on or after the date of this certification.

REACH compliant means that:

- Our products are not intended to release substances during normal and reasonably foreseeable conditions of use.
- Regarding the Substances of Very High Concern (SVHC) updated candidate list recently released by the European Chemicals Agency on Jan 12, 2017, WD products do contain Lead Titanium Zirconium Oxide, CAS # 12626-81-2 > 0.1% by wt in a component within the product per newly defined "article within an article". However the total amount of the substance present in all components as articles produced and/or imported do not exceed 1 ton per year therefore the notification is not required as per the conditions outlined under Article 7(2).
- Coin Batteries which may be included in Branded Products or Enclosure Products do contain a SVHC 1,2-dimethoxyethane, ethylene glycol dimethyl ether (EGDME), CAS# 110-71-4 > 0.1%. However the total amount of the substance present in all components as articles produced and/or imported do not exceed 1 ton per year therefore the notification is not required as per the conditions outlined under Article 7(2).
- We will continue to monitor the status of the candidate list as part of our on-going compliance activities, including the possible need under Article 33 of REACH to inform product recipients and consumers if an article contains more than 0.1% by weight per article of any substance that is added to the SVHC candidate list in the future.

HGST products are accompanied by a pouch containing silica gel that absorbs moisture.

Based upon publicly available guidance issued by the European Chemicals Agency in December 2010, HGST has concluded that this is a combination of an article (the pouch) and a substance/mixture (the silica gel inside the pouch). Accordingly, the substance (the silica gel) is subject to registration under REACH as well as the Regulation on the Classification, Labeling, and Packaging of Substances and Mixtures (CLP). As a result, HGST has filled a CLP notification of silica gel and a REACH pre-registration of silica gel with the European Chemicals Agency.

Silica gel is not considered a hazardous material and, current law does not require a label on the pouch or elsewhere due to the presence of silica gel. It is packed in a static shielding pouch and as such is unlikely to cause eye or respiratory irritation.

Shekhar Khandekar  
Sr Director – Quality System

**Table of REACH compliant HGST products is provided on the following pages.**  
**Most recent additions are highlighted in blue.**
